Proposed Task Order No. 5 ([])

STAT

STATINTL

STATINTL

Following instructions received at the TDC Meeting of 27 September,

[] met in [] office to clarify the language of subject Task Order. The clarifications, which were agreed to unanimously, were inserted on [] copies. I have attached a ditto copy of the original proposal as modified by these changes so that you will also have the [] agreement on record.

STATINTL

This revision is one of language clarification, one which tends to specify the contractor's responsibilities more precisely and to describe more clearly and differentiate more precisely the work to be performed under this proposal and the work to be performed under the Proposed Task Order No. 7 ([])

STATINTL

STATINTL

Specifically, the outputs of Proposed Task Order No. 5 ([]) are letter progress reports, the final report, the (Mark I) Operator's Manual, performance specifications for Mark II, and source and sensor specifications for the system all based on the Mark I evaluation.

STATINTL

Proposed Task Order No. 7 ([]) consists of the completed Preliminary Design, including layout drawings, for the Multiple Image Correlator, Mark II. It will also include advance data on any elements which may involve long lead-time procurement.

Inasmuch as the word clarification changes have not resulted in any change in the intent, scope, schedule or cost estimates of the project as visualized by the Technical Representative and the Contractor, the TDC approval remains valid.

This proposal remains open for a period of thirty (30) days from the

Declass Review by NIMA/DOD

Sincerely,

STATINTL
